

Designed for Research on an Epic Level

NanoPhotometer® NP80

All-in-One Spectroscopy

Microvolume and Cuvette Capability Built-in Vortex

Starting with only 0.3 μ l of sample Linear up to 2.6 Abs

Full Scan

2.5 - 4 seconds per reading 200 to 900 nm Resolution better than 1.5 nm

Regulatory Compliance, Certainty in Real Time and IQ/OQ Package

Optional CFR21 software provides password protected role based access control (RBAC), data integrity, electronic signatures and audit trail functionality Impurity and air bubble recognition with Sample Control™ and Blank Control™ Compliant with international standards in regulated environments

HotSpot

LAN

Endless Connectivity

Built-in File Server for data access from Windows and Mac computers Print to Airprint™ and HP Universal Driver compatible printers as well as DYMO Label printers REST API for LIMS integration

Battery Powered

Up to 8 hours battery operation

Flexible Unit Control and Ultimate Data Security

Computer (Windows & Mac)
Built-in touchscreen
Smartphone / Tablet (Android OS & iOS)
Proprietary NPOS immune to known threats

World's smallest footprint in its class: only 20 x 20 x 12 cm Ideal for nucleic acids, protein and samples in most organic solvents

Allows kinetic studies in a drop

No reconditioning, no recalibration and no regular maintenance ever Stand-alone operation with built-in 7 inch glove compatible touch screen Universal data output: Excel and PDF | Multi Language User Interface | Barcode ready 32 GB of onboard memory

Reviews

"I love these machines. They make my job easier."

Rating: 5.0 ★★★★

Application Area: Teaching lab/upper divisional Bioc lab

"We have 8 and I am very pleased with how easy they are to use. This is a new product for our students and they are able to follow the directions we give them and get results. With any new piece of equipment, there is a learning curve, but it's a small one once they are comfortable using them. I like the fact that they are easy to demo, easy to install updates, and easy to troubleshoot. Compared to our old specs, these save the students time, they get results quickly, each group has their own NanoPhotometer at their station... My sales rep is fantastic"

Barbara Pinch

Organization: University of Minnesota

"Great results and very accurate!"

Rating: 5.0 ★★★★

Application Area: Protein assays and concentrations

"I love love love this machine. It's portable, idiot proof, and accurate. For its DNA analysis, it is much more accurate than the old familiar... . I love the fact that it is so modifiable and easy to use. We use it for a variety of functions in the lab, including Bradford assays. I really love that there is a built-in graph for these and that you can email it to yourself or save on a USB stick. This machine is the thing we have all been needing but never knew we missed. Also the customer care is outstanding and I look forward to our rep every time she comes."
